Re: _____ **Permit No.:** B_____

The design and installation of the heating system at the above noted address is in compliance with Section 9.33 of the BC Building Code.

Specifically:

- The design, construction and installation conform to good engineering practice.
- All control equipment, component parts and systems are installed to provide easy access for inspection, maintenance and cleaning.
- All systems and respective thermostats are operational and functioning in good working order.
- The system is capable of maintaining an indoor air temperature of 22°C at the outside winter design temperatures as described in Article 9.33.3.
- All floor coverings are installed in accordance with the types noted on the heat loss calculations.
