A.1 The City will consider alternative, equivalent resurfacing materials to those specified. Dear Sir/Madame:

Re: Request for Quotation 3520Q – Resurface South Arm Tennis Courts– Addendum 2

Part 1: Inquiries

We have received further questions and comments related to this Request for Quotation (RFQ). This addendum lists the questions we have received, together with our answers. This addendum forms part of the Contract Documents and shall be read, interpreted and coordinated with all other parts. Please review and consider the following information in preparation of your quotations:

- Q.1 There are several large cracks running parallel to the court between the courts. Does the city have any concern on this matter? (One) concern is that applying the crack filler will fail in relatively short order if an expansion joint is not installed.
- A.1 Yes, the City's goal is to primarily have the courts available to accommodate a major tournament later this summer. It is our understanding that any 'filler" type of installation will last at most a couple of years before the cracks start to show again. You may if you wish, is to provide an alternative cost (Option 2) to your bid, which covers the additional or recommended work to prolong the courts lifespan. We will consider options within our budget.
- Q.2 Are cracks along the fence lines to be filled as well?
- A.2 No, these can be painted over at this time. Eventually, we want a complete resurfacing of the asphalt for long-term use and durability, pending available funding.
- Q.3 The specification says, “remove and replace any net posts where damaged beyond repair”. Are these (posts) to be coated with a corrosion resistant coating?
- A.3 We notice a few net posts that were slanted to one side. If they can be straightened out without replacing the footings or the posts themselves, then that is fine. If there are cost savings by only retrofitting the posts, then please include that information with your quotation.
- Q.4 The concrete around several of the fence posts has heaved, presumably from freezing. In some cases, the slab around the fence post seems to be as much as 1/2" higher than the surrounding slab. How would you like this situation to be addressed?

- A.4 If the area affected is well beyond the play zones, we will address it in a subsequent project (refer to answer A2 for context).
- Q.5 Several sections of the fence are heavily corroded. Should (bidders) set aside a contingency fund for damage to the fence?
- A.5 Damages to the chain link mesh which are already corroded would not be a concern since we will replace those sections. The fence posts however, with the exception of a few obvious ones will not be replaced due to our limited budget. A contingency fund should be set aside for this if they are damaged during the proposed works.
- Q.6 Do you require us to submit a copy of our internal quality control records including application conditions and thickness tests upon completion of the project? Are there any specific items for quality control in which we are to monitor and submit a report to you upon completion?
- A.6 Any information you can provide regarding quality control would be beneficial, specifically during the evaluation process of the quotations. As the award of contracts is based on a number of criteria including references and the bidders ability to meet the City's specifications and performance criteria, the City will review each bidders installation histories & references (both preferably from other Cities and Municipalities) and may perform site inspections of past installations.
