- (a) the **City** will determine the average amount of water recorded for the **metered property** per billing period for the last twelve months, and if that information is unavailable, by using the average for the same type of property over the past 12 months (the "**average amount**");
- (b) if the amount of water recorded for the **metered property** for:
 - (i) the billing period in which the leak was discovered is greater than the **average amount**, the **property owner** will pay **sanitary sewer** system user fees under subsection 2.1.1 based upon the metered rate specified in Part 2 of Schedule B applied to all amounts recorded up to the **average amount** for that billing period; and
 - (ii) the billing period previous to that in which the leak was discovered is greater than the **average amount**, the **property owner** will pay **sanitary sewer** system user fees under subsection 2.1.1 based upon the metered rate specified in Part 2 of Schedule B applied to all amounts recorded up to the **average amount** for that billing period.
