

ATTENTION:

Cross Connection Control Testers

CCC Tester Gauge Calibration Report Policy

It is the responsibility of the water purveyor to ensure that the testing of backflow prevention devices is being conducted with properly calibrated backflow test gauges. BCWWA will continue to advise CCC testers that gauges require annual calibration in order to remain effective.

As the water purveyor, the City of Richmond must request that Backflow Assembly Test Reports include mechanical test kit calibration information to be completed by a licensed tester and **submit a copy of the calibration report annually** to the City of Richmond, Plumbing/Gas Inspection Section by one of the following methods:
