

The City of Richmond

2010 Recreation and Physical Fitness Syndicated Survey

Methodology

- 300 telephone interviews with a randomly selected representative sample of Richmond residents aged 16 years or older.
- Conducted between January 29 and February 10, 2010.
- Overall results accurate to within ± 5.7 percentage points, 19 times out of 20. The margin of error will be larger for sample subgroups.
- Final data was weighted to ensure the age and gender distribution reflects that of the actual population in Richmond according to the 2006 Census data.
- Where appropriate, results have been compared to previous surveys conducted by the City of Richmond.
 - ▲ means the results are significantly higher than what was reported the previous year
 - ▼ means the results are significantly lower than what was reported the previous year
- Results have also been compared to Ipsos Reid's database of municipal norms (where appropriate).

Participation in Physical Activity

Current Fitness Level

Generally speaking, would you describe your current level of physical fitness as...?

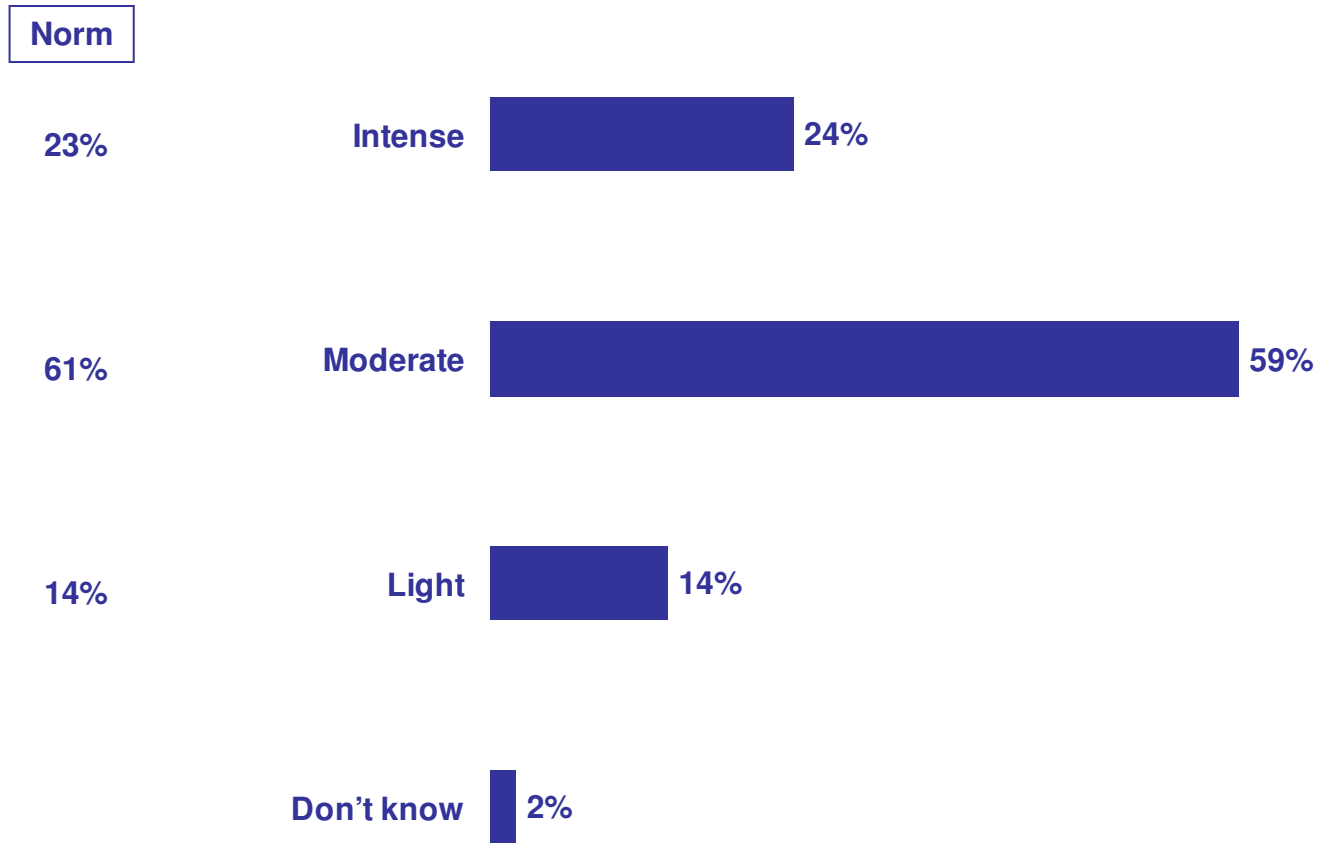

Base: All respondents (n=300)

Intensity of Effort When Participating in Physical Activity
